

To whom it may concern,

As a legal gun owner in Connecticut i would like to state, that i am opposed to a new ban on firearms and magazines of any kind. I also find it absurd that some would create a bill, redefining cretin characteristic of a firearm, so it can be labeled as an assault or military style weapon. i have shot many different styles and calibers of firearms and most certainly do not find the 5.56 nato round to be superior over all others. Though this is has been the main focus on preventing gun violence and it is obvious why. Over the last few months i've watched a media lynch mob against so called assault weapons and intentionally spreading misinformation of what they are capable of. it is appalling to me that some of my elected officials would choose to do the same. Misinforming the people and then saying, the majority are for a ban on assault weapons and magazines is deceitful and an abuse of there roll in government.

I would like to see laws that truly prevent gun violence not such that turn law abiding citizens into criminals.
